OM THAKUR

Software Development Engineer II (SDE-2) | Java Backend

Indore, MP, India | +91-9302975212 | omsinghthakur930@gmail.com | LinkedIn | GitHub | LeetCode

PROFESSIONAL SUMMARY

Impact-driven Software Development Engineer II (SDE-2) with 2.5 years of experience (2 years full-time + 6 months internship) leading backend architectural design, distributed microservices, and database scalability. Proven expertise in event-driven streaming with Apache Kafka, multi-layer caching with Redis clusters, database sharding/partitioning, and Kubernetes container orchestration. Spearheaded multiple system modernization initiatives that boosted system throughput by 3x and reduced infrastructure compute costs by 28%. Dedicated mentor and agile technical lead.

TECHNICAL SKILLS

Languages: Java (17/21), SQL, Go (basic), Python (scripting)

Distributed Systems: Spring Boot 3, Spring Cloud, Netflix Eureka, OpenFeign, Resilience4j (Circuit Breaker), API Gateway, Distributed Tracing (Micrometer, Zipkin)

Event Streaming & Messaging: Apache Kafka (Topics, Partitions, Consumer Groups, Dead Letter Queues), RabbitMQ

Databases & Storage: MySQL, PostgreSQL, MongoDB, Redis Cluster, Elasticsearch (ELK), Flyway

Cloud & DevOps: Docker, Kubernetes (K8s), Helm, AWS (EC2, S3, RDS, ECS), GitHub Actions, Terraform (basics)

Architecture & Practices: Microservices Decomposition, Event-Driven Architecture, CQRS Pattern, Domain-Driven Design (DDD), CI/CD Automation

PROFESSIONAL EXPERIENCE

Software Development Engineer II (SDE-2) | Apex Fintech Solutions (or Enterprise SaaS), Indore (Remote) *October 2025 - Present (1 Year)*

- Led the architecture and migration of a legacy monolithic billing system into 6 independent Spring Boot microservices deployed on AWS EKS.
- Designed an event-driven event ingestion pipeline using Apache Kafka processing 450,000+ daily transactions with exactly-once processing semantics.
- Implemented Resilience4j circuit breakers, rate limiters, and bulkhead patterns across inter-service RPC calls, preventing cascading network failures.
- Restructured PostgreSQL database indexes and partitioned multi-million-row financial ledger tables, slashing 99th percentile query latency from 850ms to 120ms.
- Mentored 4 junior engineers on clean code practices, SOLID principles, and distributed debugging; instituted automated CI/CD quality gates.

Software Engineer (SDE-1) | Tech Corp, Indore *October 2024 - September 2025 (1 Year Full-Time)*

- Developed 20+ core business REST APIs using Java 17 and Spring Boot 3, sustaining 99.95% uptime for consumer-facing services.
- Integrated Redis distributed cache layer with Cache-Aside and Write-Through patterns, offloading 50% read traffic from primary MySQL clusters.
- Configured STOMP WebSockets for instant user messaging and notification broadcast feeds handling 2,000+ active sessions.
- Automated deployment workflows with Docker and GitHub Actions, slashing release deployment cycles from 2 hours to 8 minutes.

Java Developer Intern | Dollop Infotech, Indore *April 2024 - September 2024 (6 Months)*

- Built secure REST APIs with Spring Boot, Spring Security, JWT authentication, and Hibernate ORM.
- Automated database schema evolutions with Flyway and wrote unit tests with JUnit 5/Mockito.

KEY TECHNICAL PROJECTS

High-Throughput Social Feed & Media Engine (Instagram Scale) | *GitHub: github.com/Omsingh1912/Instagram-clone*

Tech: Java 21, Spring Boot 3, Kafka, Redis Cluster, WebSockets, PostgreSQL, Docker, AWS EKS

- Engineered a distributed social platform backend featuring asynchronous feed generation using Kafka fan-out workers and Redis sorted sets.
- Secured microservices with OAuth2 resource servers and JWT claims validation; deployed on Kubernetes with automated HPA autoscaling.

Distributed Multi-Tenant Sales Pipeline & CRM Engine

Tech: Java 17, Spring Boot, Spring Security, Redis, MySQL, Flyway, Docker Compose

- Engineered multi-tenant sales CRM pipeline managing dynamic lead stages and high-volume batch data exports with multi-threaded JDBC execution.
- Enforced automated schema migrations across all tenant databases using Flyway.

PROBLEM SOLVING & ALGORITHMS

200+ LeetCode problems solved. Strong system design acumen: Microservices Decomposition, CAP Theorem, Database Sharding, Eventual Consistency, Idempotency, Rate Limiting Algorithms.

EDUCATION

Bachelor of Technology (B.Tech) - Information Technology | Sushila Devi Bansal College of Technology (SDBCT), Indore *Graduated: 2024 | CGPA: 6.9 / 10*
